Guiding Principles of School Environmental Quality

- **Every child and school employee has a right to an environmentally safe and healthy learning environment which is clean and in good repair.**
- **Every child, parent and school employee has a “right to know” about environmental health issues and hazards in their school environment.**
- **School officials and appropriate public agencies should be held accountable for environmentally safe and healthy school facilities.**
- **Schools should serve as role models for environmentally responsible behavior.**
- **Federal, State, local and private sector entities should work together to ensure that resources are used effectively and efficiently to address environmental health and safety conditions.**
